PROJECTS

SHOPC.CO

REACTJS | NODEJS

I developed a comprehensive online shop website. This project allowed me to master CRUD operations, data handling, and backend data fetching, all crucial for creating dynamic web applications. Additionally, I integrated SQL database management, further strengthening my skills in data storage and retrieval.

I implemented responsive design using Tailwind CSS, to create a user-friendly interfaces. This project not only enhanced my technical skills but also highlighted my ability to create practical, real-world applications.

SPACEX REPLICA

NEXTJS | NODEJS

I recreated the SpaceX website, replicating its design and functionality. This project enabled me to enhance my skills in front-end development, user experience design, web animation, responsive design, and problem-solving. It provided a valuable opportunity to master version controle, and develop a keen eye for detail. This experience underscores my commitment to continuous learning and proficiency in web development.

VANLIFE

REACT | REACT-ROUTER

This is a website I created to improve my skills in routing using react-router.
